Petroleum and natural gas industries — Glass-reinforced plastics (GRP) piping

Part 3: **This is a preview. Click here to purchase the full publication.**

AS ISO 14692.3:2022

This Australian Standard ® was prepared by ME-092, Materials, equipment, structures and related services for petroleum, petrochemical and natural gas industries. It was approved on behalf of the Council of Standards Australia on 20 April 2022.

This Standard was published on 13 May 2022.

The following are represented on Committee ME-092:

- Australian Industry Group
- Australian Organisation for Quality
- Australian Petroleum Production and Exploration Association
- Australian Pipelines and Gas Association
- Department for Energy and Mining, SA
- Department of Mines, Industry Regulation and Safety WA
- DNV GL Oil and Gas
- Energy Safe Victoria
- Engineers Australia
- National Energy Resources Australia
- Resources Safety & Health Queensland
- University of Western Australia

Preface

This Standard was prepared by the Standards Australia Committee ME-092, Materials, equipment, structures and related services for petroleum, petrochemical and natural gas industries.

The objective of this document is to outline requirements for the design of GRP piping systems. The requirements and recommendations apply to layout dimensions, hydraulic design, structural design, detailing, fire endurance, spread of fire and emissions, and control of electrostatic discharge.

This document is intended to be read in conjunction with AS ISO 14692.1:2022.

This document is identical with, and has been reproduced from, ISO 14692-3:2017, *Petroleum and natural gas industries — Glass-reinforced plastics (GRP) piping — Part 3: System design*.

As this document has been reproduced from an International document, a full point substitutes for a comma when referring to a decimal marker.

Australian or Australian/New Zealand Standards that are identical adoptions of international normative references may be used interchangeably. Refer to the online catalogue for information on specific Standards.

The terms **This is a preview. Click here to purchase the full publication.** the appendices or annexes to which they apply. A “normative” appendix or annex is an integral part of a Standard, whereas an “informative” appendix or annex is only for information and guidance.

Contents

Preface	ii
Foreword	v
Introduction	vi
1 Scope	1
2 Normative references	2
3 Terms and definitions	3
4 Layout requirements	3
4.1 General	3
4.2 Space requirements	4
4.3 System supports	4
4.3.1 General	4
4.3.2 Pipe-support contact surface	5
4.4 Isolation and access for cleaning	5
4.5 Vulnerability	5
4.5.3 Dynamic excitation and interaction with adjacent equipment and piping	6
4.5.4 Exposure to light and ultraviolet radiation	6
4.5.5 Low temperatures and requirements for insulation	6
4.6 Fire and blast	6
5 Hydraulic design	7
5.1 General	7
5.2 Flow characteristics	7
5.3 General velocity limitations	7
5.4 Erosion	8
5.4.1 General	8
5.4.2 Particulate content	8
5.4.3 Piping configuration	8
5.4.4 Cavitation	8
5.5 Water hammer	8
6 Generation of design envelopes	9
6.1 Partial factors	9
6.1.1 Design life	9
6.1.2 Chemical degradation	9
6.1.3 Fatigue and cyclic loading	9
6.2 Part factor, f_2	10
6.3 Combinations of part factor and partial factors	11
6.4 Design envelope	11
7 Stress analysis	13
7.1 Analysis methods	13
7.2 Pipe stress analysis software	14
7.3 Analysis requirements	14
7.4 Flexibility factors	14
7.5 Stress intensification factors	14
7.6 Modelling fittings	15
7.7 Allowable deflections	15
7.7.1 Vertical deflection in aboveground piping systems	15
7.7.2 Vertical deflection in buried piping systems	15
7.8 Allowable stresses	16
7.9 External pressure	19
7.10 Axial compressive loading (buckling)	20

This is a preview. Click here to purchase the full publication.

7.10.1	Shell buckling.....	20
7.10.2	Euler buckling.....	20
7.10.3	Buckling pressure — Buried piping.....	21
7.10.4	Upheaval buckling pressure.....	22
7.11	Longitudinal pressure expansion.....	23
8	Other design aspects.....	23
8.1	Fire.....	23
8.1.1	General.....	23
8.1.2	Fire endurance.....	24
8.1.3	Fire reaction.....	24
8.1.4	Fire-protective coatings.....	25
8.2	Static electricity.....	25
9	Installer and operator documentation.....	26
Annex A	(normative) Cyclic de-rating factor — A_3.....	27
Annex B	(normative) Flexibility factors and stress intensification factors.....	29
Bibliography	36
