Preface

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee CT-001, Interconnection of Information Technology equipment.

The objective of this document is to specify the measurement of two- and four-pair balanced cabling of the following:

- (a) End-to-end (E2E) link Class D, E and E_A.
- (b) Modular plug terminated links (MPTLs) of Class D, E, E_A, F, F_A and of Class I and II.
- (c) Direct attach cabling of Class D, E, E_A, F, F_A and of Class I and II.

The free connectors which terminate two and four pairs in field and laboratory conditions are included.

This document is an adoption with national modifications, and has been reproduced from, ISO/IEC 14763-4:2021, *Information technology – Implementation and operation of customer premises cabling – Part 4: Measurement of end-to-end (E2E) links, modular plug terminated links (MPTLs) and direct attach cabling*.

The modification **This is a preview. Click here to purchase the full publication.** is added at the end of the source text.

[Appendix ZZ](#) lists the modifications to ISO/IEC 14763-4:2021 for the application of this document in Australia and New Zealand.

As this document has been reproduced from an International document, the following applies:

- (a) In the source text “this part of ISO/IEC 14763” should read “this document”.
- (b) A full point substitutes for a comma when referring to a decimal marker.

Australian or Australian/New Zealand Standards that are identical adoptions of international normative references may be used interchangeably. Refer to the online catalogue for information on specific Standards.

The terms “normative” and “informative” are used in Standards to define the application of the appendices or annexes to which they apply. A “normative” appendix or annex is an integral part of a Standard, whereas an “informative” appendix or annex is only for information and guidance.
