Preface

This Standard was prepared by the Standards Australia Committee QR-008, Quality Systems to supersede AS ISO 10013—2003, *Guidelines for quality management system documentation*.

The objective of this document is to provide guidance for the development and maintenance of the documented information necessary to support an effective quality management system, tailored to the specific needs of the organization.

This document can also be used to support other management systems, e.g. environmental, or occupational health and safety management systems.

This document is identical with, and has been reproduced from, ISO 10013:2021, *Quality management systems — Guidance for documented information*.

As this document has been reproduced from an International Standard, a full point substitutes for a comma when referring to a decimal marker.

Australian or Australian/New Zealand Standards that are identical adoptions of international normative references may be used interchangeably. Refer to the online catalogue for information on specific Sta
